

MON PLAN DE VILLE

LEARNING GOAL: Using your notes and your textbook, you are going to create a map of an imaginary city.

DIRECTIVES:

Le plan

1. Begin by choosing TEN different places in the city you wish to have on your map.
2. Indicate these buildings on your map with either a topographic symbol, such as a rectangle, or with a 3-D type drawing.
3. Label each building in French with the Le, La, Les or L' in front.
4. You must also include your own house. Label this **CHEZ MOI**.
5. You will need to join your buildings by a minimum of four different roads. Give a name to each road. You must indicate if it is a street or road or boulevard first, then put the name. p.e. Rue King
6. Colour your map carefully and be sure all final labels are written in INK.

Le paragraphe

HINT: Use pages 49 and 53 as guides for your map!

1. Begin at your house and present it. *Voici chez moi.*
2. Tell how to get to a different building in your city from your house. Use the proper directions in French as well as the street names, as we did in class. You must have three different directions to get there – two turns and a go straight, for example.
3. Situate the building by giving its position in relation to another building. *Pe. La banque est en face de l'école.*
4. Tell which mode of transportation you use to arrive to the building in the winter.
5. Use the model on page 67 of your text as a guide.
